APARTMENT VACANCY AND RENTAL COST SURVEY
SUMMARY OF FINDINGS

This survey was conducted to determine vacancies as well as rental costs in multi-family rental units in 89 municipalities across the Province, excluding Edmonton and Calgary. The survey of these two cities is presently handled by Canada Mortgage and Housing Corporation (CMHC). Non-subsidized rental buildings with four or more rental units were included in the survey. For a municipality to be included in the survey, it has to have a population of at least 1000 and 30 or more rental units. A number of other centres were surveyed by CMHC. These centres include Comrose, Lethbridge, Medicine Hat, Red Deer, Brooks, Crowsnest Pass, and Red Cliff. Alberta Housing and Public Works used information supplied on the centres by CMHC rather than duplicate their work. It should be observed that Wetaskiwin and Crowsnest Pass are not included in this report. Although CMHC did survey the two centres, the data which they collected were not sufficient to justify their inclusion without significantly biasing the total results.

Field researchers from Market and Economic Analysis Branch visited and interviewed landlords, rental managers or management agencies in each of the centres, during the summer of 1982. Data was collected using designed questionnairs which sought the age of the building, number, type, vacancies and rent costs for suites. Call backs were made either in person or by telephone.

Section 1

Table 1 shows the estimated number of rental units in each municipality and indicates also the actual units accounted for in the analysis both in absolute numbers and percentages.

Of the 89 centres surveyed, 100% response was recorded in 73 of these, while the percentage response ranged between 70.9% and 99.4% in the remaining 16 centres.

Table 2 indicates a breakdown of average rent and rental range by type of suite. Following is a summary of high and low rents by type of suite and by centre.

CITIES

Type	Low $	Municipality	High $	Municipality
Bachelor	155	Drumheller	679	Fort McMurray
One-Bedroom	261	Medicine Hat	485	Fort McMurray
Two-Bedroom	332	Medicine Hat	568	Fort McMurray
Three-Bedroom	364	Camrose	611	St. Albert
Four-Bedroom	400	Red Deer	582	St. Albert

TOWNS

Bachelor	135	Spirit River	442	High Level
One-Bedroom	175	Bruderheim	539	High Level
Two-Bedroom	281	Raymond	623	Banff
Three-Bedroom	265	Cardston	712	Banff
Four-Bedroom	390	Peace River	621	Jasper

Table 3 gives vacancies by age of building. Vacancies range from 0.0% to 31.5%. The average vacancy recorded for the cities is 10.1%; the average for last year was 3.7%. For the towns, the average vacancy is 7.9%, as opposed to 5.8% last year. The average vacancy for the Province is 9.1% as opposed to 4.6%, the previous year.

Table 4 shows the number and percentage of vacancies by type of building. The highest percentage vacancy is found in the Walk-up grouping, 10.9%, while the lowest vacancies are registered among Townhouses, 4.8%.

Table 5 indicates the number and percentage of vacancies by type of suite. Although the four-bedroom type has the fewest number of suites, the highest percentage vacancy is nonetheless found in this grouping, 10.1%. The percentage vacancy among bachelors' suites stands at 11.8%; this is followed closely by the percentage vacancy in the one-bedroom grouping, 11.2%. The two-bedroom grouping with the highest number of units among all five groupings, has an 8.7% vacancy, while the three-bedroom grouping with approximately one quarter the number of two-bedroom units indicates a 5.7% vacancy.

Appendix I provides a historical summary of the percentage vacancy in the various centres over the past years.

Appendix II presents detailed information on each community that was surveyed.

Questions, comments and suggestions concerning this study are invited and should be directed to:

* This indicates municipalities where less than 30 units exist at the time of survey.
**This indicates municipalities surveyed by Canada Mortgage and Housing Corporation (CMHC) in April 1982. Alberta Housing and Public Works used information supplied by CMHC rather than duplicate their survey activity.

The CMHC survey did not include buildings aged less than 6 months.
